Ratings Issuer

Banca Sella Holding Banca Sella Holding Banca Sella SpA Banca Sella SpA Banca Sella SpA

Rating Drivers

Factors with Positive Rating Implications

 An upgrade of the Long-Term ratings would require a material improvement in profitability or further structural strengthening of capitalisation levels.

Factors with Negative Rating Implications

 A downgrade would arise from a substantial deterioration in capital, a material increase in NPLs or significant negative impact on profitability.

Rating Considerations

Franchise Strength (Moderate / Weak)

 Small franchise with a solid retail market position in the home region of Piedmont. The Group benefits from a diversified franchise, with growing private banking and payment system activities.

Earnings Power (Moderate)

 Modest but resilient profitability, thanks to a diversified revenue structure. Weak but improving operating efficiency. Cost of risk has normalised.

Risk Profile (Moderate)

 Stock of NPLs has continued to decrease. Asset quality metrics now more in line with European peers. However, concentration on SMEs makes the bank somewhat vulnerable in the current environment.

Funding and Liquidity (Good)

 Sound funding and liquidity position, underpinned by a large retail deposit base and ample liquidity buffers

Capitalisation (Moderate / Weak)

Adequate capital buffers over minimum requirements. Capital levels have improved following the implementation of AIRB in 2022. However, they remain at the lower-end of the peer group.

Issuer Description

Based in Biella (Italy), Banca Sella Holding SpA (Sella or the Group) is the parent company of the Sella Group. The Group's main activities are retail & commercial banking, asset management and private banking, payment systems, leasing and consumer finance.

Rating Rationale

The ratings continue to reflect Sella's relatively small but solid and diversified franchise. Ratings are also underpinned by Sella's stable funding and liquidity position. The rating level also considers the Group's improved core profitability driven by higher operating efficiency and lower cost of risk when compared to peers. We consider that revenues will continue to benefit over the medium term from digital banking, a strong contribution from non-interest income, higher rates and stabilisation of the cost base, as laid out in its strategic plan. Nevertheless, despite improvement, the Group continues to report relatively weak efficiency ratios relative to peers due to franchise reinvestment.

In addition, the ratings take into account Sella's asset quality with the Non-Performing Exposure (NPE) ratio now in range with its domestic and European peers. However, we expect geopolitical tensions, rising interest rates and high inflation to lead to a rise in defaults, although we view Sella's improved asset quality metrics to be a mitigating factor.

We also take into account that capital ratios have notably improved in 2022 thanks to the implementation of the AIRB (advanced internal ratings-based approach) in 2022. However, we also note that capital ratios remain at the low end of the peer group and, as a non-listed bank, the Group has less capital flexibility.

Franchise Strength

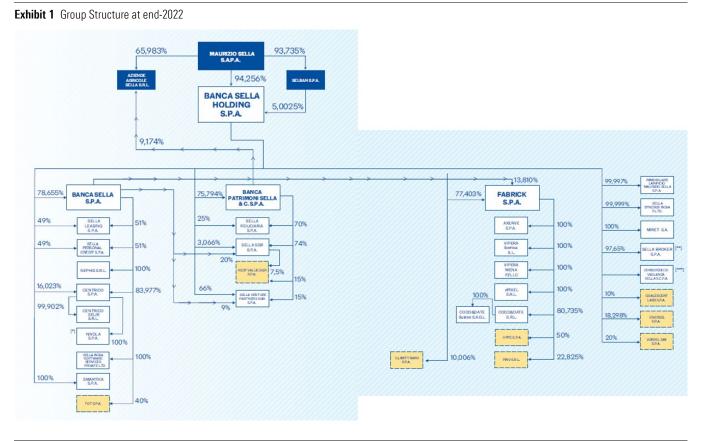

Scorecard BB Assessment	Grids BB Assessment	Combined BB Assessment
Moderate / Weak	Moderate / Weak	Moderate / Weak

Banca Sella Holding (Sella or the Group) is a small Italian banking group with EUR 21.3 billion in total assets at end-Q1 2023. The Group maintains a solid market position in retail and commercial banking, especially in the home province of Biella. Unlike many peers of similar size, Sella's franchise is more diversified, thanks to its private banking and asset management activities, nationwide payment system as well as consumer finance and leasing operations.

The Group has been historically controlled by the Sella family, and they are also broadly involved in the Group's corporate governance. In DBRS Morningstar's view, the corporate governance risks potentially associated with the family ownership are mitigated by the following factors: 1) the Group's exposure to the Sella family is limited; and 2) the banking business is the main activity of the Sella family. The Sella family controls the Group via Maurizio Sella Sapa which owns 94% of Banca Sella Holding SpA. Legally a bank, Banca Sella Holding SpA acts as the Group's treasury and manages the funding with institutional counterparties, including the ECB, as well as the overall business strategy and planning. In April 2020, Massimo Vigo became CEO of Banca Sella SpA (the Bank), succeeding Claudio Musiari who retired.

The Group manages the raising of deposits and lending to households and SMEs through the Bank, its main operating subsidiary. Banca Sella includes the Group's branch network as well as the electronic banking and internet services (with the exception of Hype). Private banking and asset management products are offered via both the private banking unit of Banca Sella SpA and Banca Patrimoni Sella SpA, while corporate and investment banking services are provided by Sella CIB, which was created at end-2018. In addition, the Group offers consumer finance and leasing products, through Sella Personal Credit and Sella Leasing, as well as payments platforms, provided by Banca Sella SpA and Axerve SpA.

Sella has stepped up its effort in digital banking and new technologies in recent years. In 2015 the Group created "Hype", a mobile app for digital banking and payments solutions which has gained increasing popularity since its introduction. Sella also launched the first open banking platform in Italy ("platfr.io"), as well as setting up Fabrick SpA, a subsidiary aimed at investing in fintech businesses and innovative payment and banking solutions. In 2018, Sella launched "Sella Evolution" in collaboration with Moneyfarm, an online trading platform for private customers. In 2020, Sella also launched the first industrial consolidation operation in the Italian open banking market, following the signing of the joint venture together with Illimity in Hype, to further boost its growth. Nevertheless, the bank decided to refocus on core activities and deconsolidate Hype in 2021 to boost profits and improving operating efficiency. In 2022, the Group, through its subsidiary Centrico, has signed a long-term partnership with Sesa with the aim of strengthening the presence on the Italian market in the field of software solutions, business processes outsourcing and application services for the Financial Services industry, in order to improve profits for the Sella group.

Earnings Power

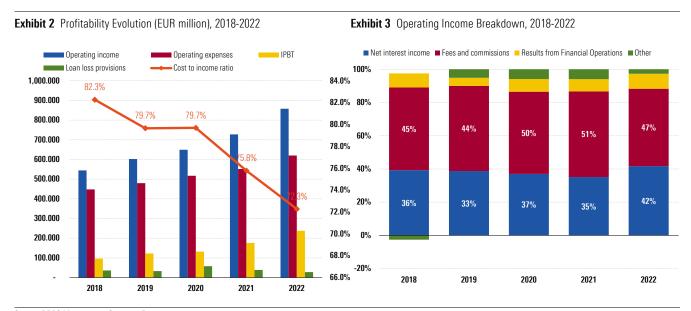

Scorecard BB Assessment	Grids BB Assessment	Combined BB Assessment
Good /Moderate	Moderate / Weak	Moderate

In 2022, the Group reported net attributable income of EUR 91.9 million, down by 15% YoY from EUR 108.3 million in in 2021. However, when excluding the non-recurrent effect from the capital gains stemming from the deconsolidation of Hype, following the setup of the joint-venture with Illimity in 2021, the Group's net income actually went up by 68% from EUR 56 million. Results were supported by higher revenues and lower provisions which offset higher operating expenses. Net interest income for the Group was up 42.6% YoY in 2022, thanks to solid volume growth and the positive effect from inflation-indexed securities. Net fees and commissions were up 7.5%, thanks to diversification of activities, with solid performance reported in all segments.

Whilst the Group's cost to income ratio remains high as a result of Sella's investments in new technologies and innovative banking products, operating efficiency has improved since the deconsolidation of Hype and the cost to income ratio as calculated by DBRS Morningstar stood at 72.3%, compared to 75.8% a year earlier.

Provisions were down 33% YoY and back to 2019 levels . As a result, the cost of risk normalised at 37 bps in 2022 against 58 bps in 2021.

In Q1 2023, the Group reported net attributable income of EUR 48.0 million, up from EUR 35.0 million in Q1 2022. This was a result of higher revenue generation, mainly driven by higher net interest income on the back of raising interest rates, which offset higher operating costs and higher loan loss provisions. Cost of risk remained contained at 41 bps.

Risk Profile

Scorecard BB Assessment	Grids BB Assessment	Combined BB Assessment	
Good /Moderate	Moderate / Weak	Moderate	

Sella's risk profile is consistent with its retail and commercial banking franchise, with approximately 85% of total risk weighted assets (RWA) linked to credit and counterparty risk as of end-2022. Most of the lending activity is carried out at the operating Banca Sella SpA, which provides the vast majority of the Group's net loans to customers. The Group's lending is primarily to retail, SMEs and corporate clients and is largely represented by mortgages (around 50%), credit cards and personal loans (around 15%) and leasing (around 10%) at end-2022. Sella's loan book is composed of around 36% of SME exposures, which is twice the average for the Italian banking sector. Interest rate risk is low, with market risk mostly arising from the Group's fixed-income portfolio, including its large exposure to Italian sovereign debt. Whilst NPEs have been declining in recent years, we expect geopolitical tensions, rising interest rates and high inflation to lead to a rise in defaults, although we view Sella's improved asset quality metrics to be a mitigating factor.

Credit Risk

DBRS Morningstar notes that Sella has delivered so far on its announced business strategy to reduce the Group's stock of NPEs via disposals (EUR 59 million in 2022) and internal management actions. As a result, the Group's asset quality has continued to improve in 2022 with the total stock

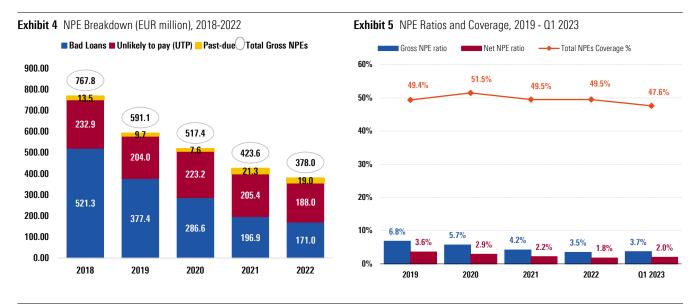

of gross non-performing exposures (NPEs) decreasing to EUR 378 million at end-2022 from EUR 424 million at end-2021. The Group's gross NPE ratio stood at 3.7% at end-01 2023 compared to 3.5% at end-2022 and down from 4.2% at end-2021. We see this level as comparing favourably to domestic banks and more in line with the average for European banks. The net NPL ratio was 2.0% at end-01 2023 compared to 2.2% at end-2021. The Group's total coverage ratio stood at 47.6% at end-01 2023 fairly stable in recent years, with total coverage of bad loans improving to 65.7%, fairly stable from 67.1% at end-2021.

Sovereign and Interest Rate Risk

Sella's risk profile includes a sizable exposure to the Italian sovereign. At end-2022, the Group's securities portfolio comprised EUR 2.9 billion of Italian government bonds, corresponding to approximately 15% of the Group's total assets and 2.7x CET1 capital. Nevertheless, DBRS Morningstar notes that around 70% of Sella's securities portfolio is classified as held to collect (HTC) to reduce sensitivity to spread widening. DBRS Morningstar also notes that, based on the outlier stress test applied on the banking book, the worst-case scenario impact of unrealized losses on the Group's capital ratio would be manageable at EUR 136 million after-tax at end-March 2023.

Market Risk

Market risk is limited for Sella. The average VaR which represents the maximum loss in net present value Sella might be facing in normal market conditions over a period of 3 months with a confidence interval of 99% at end-2022 was around EUR 18 million, within the Group's internal limit of EUR 83 million.

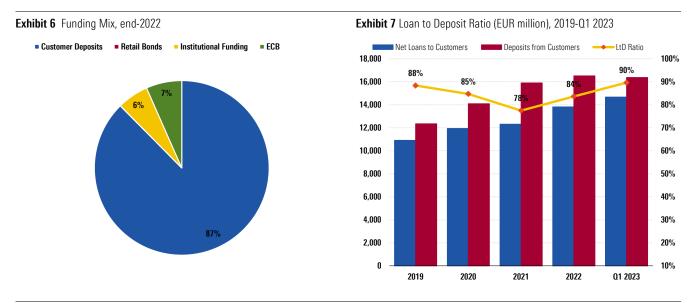

Source: DBRS Morningstar, Company Documents.

Funding and Liquidity

Scorecard BB Assessment	Grids BB Assessment	Combined BB Assessment
Strong / Good	Moderate	Good

DBRS Morningstar views Sella's funding profile as good, supported by its large deposit retail franchise and limited reliance on wholesale funds. The majority of Sella's deposits are generated by Banca Sella SpA, the commercial bank of the Group, whilst Banca Sella Holding acts as treasurer and manages the institutional funding. Customer deposits remain the primary source of funding, accounting for 87% of the Group's total funding. Around half of these deposits are covered by the Deposit Guarantee Scheme, in line with other European banks and we consider the deposit base to be very granular. In addition, DBRS Morningstar notes that despite early repayments following the ECB's changes to the TLTRO III programme, the Group had EUR 1.4 billion of ECB's TLTRO III funds, which still represents 7% of the Group's total funding.

Sella's liquidity position remains solid with a total stock of unencumbered assets of around EUR 4.0 billion at end-2022, which compares favourably with future bond maturities. At end-Q1 2023, Sella's liquidity coverage ratio (LCR) and net stable funding ratio (NSFR) remained well above regulatory requirements at respectively 167% and 127%.

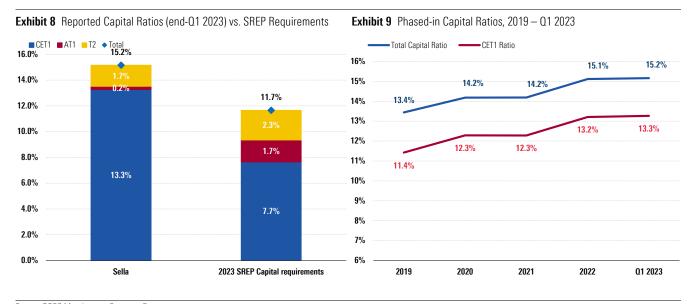

Source: DBRS Morningstar, Company Documents.

Capitalisation

Scorecard BB Assessment	Grids BB Assessment	Combined BB Assessment
Moderate / Weak	Moderate / Weak	Moderate / Weak

Whilst Sella's capitalisation remains modest, capital ratios have continued to increase in 2022 thanks to internal capital generation, bad loan disposals and the implementation of the AIRB models. Sella reported at end-Q1 2023 a phased-in CET1 ratio of 13.3% compared to 12.3% at end-2021. The phased-in Total Capital ratio was 15.2%, up from 14.2% at end-2021. This provides the Group with adequate cushions over the minimum requirements set by the Bank of Italy for 2023 for CET1 of 7.65% and 11.65% for Total Capital according to the Supervisory Review and Evaluation Process (SREP). Sella also reported a transitional leverage ratio of 5.2% at end-Q1 2023.

A Significant Effect means that the impact of the applicable ESG risk factor has changed the rating or trend on the issuer.

ESG Considerations

Environmental

The Environmental factor does not affect the ratings or trend assigned to Sella. The Bank did not sign up for the TCFD disclosures for the time being. However, the Bank has integrated the assessment of sustainability risks into its internal processes related to its investment advisory services. The ECB climate risk stress-test results were published on July 8, 2022. While they did not provide detailed indications on the geographies potentially affected under the selected scenarios, participating European banks were told they need to enhance their climate risk stress testing framework. In the meantime, we note the results will be integrated into two SREP elements in a qualitative manner: (i) business model assessment, and (ii) internal governance and risk management.

Social

The Social factor does not affect the ratings or trend assigned to Sella. Shortcomings in the Bank's internal process regarding data protection could have a significant impact on Sella's reputation and franchise. However, there have been no cases of this kind to date involving Sella. Since the invasion of Ukraine, there is a heightened risk of cyber-attacks targeted towards banks, and any significant data breach or cybersecurity attack could have significant reputational and financial consequences.

Governance

The Governance factor does not affect the ratings or trend assigned to Sella. Shortcomings regarding business ethics or governance could have a significant impact on Sella's reputation and franchise or income statement. However, there has been no cases of this kind to date involving Sella. The Bank's current Board of Directors (BoD) consists of 13 members, of which 4 are independent.

The Group has been historically controlled by the Sella family, and they are also broadly involved in the Group's corporate governance. In DBRS Morningstar's view, the corporate governance risks potentially associated with the family ownership are mitigated by the following factors: 1) the Group's exposure to the Sella family is limited; and 2) the banking business is the main activity of the Sella family

About DBRS Morningstar

DBRS Morningstar is a full-service global credit ratings business with approximately 700 employees around the world. We're a market leader in Canada, and in multiple asset classes across the U.S. and Europe.

We rate more than 3,000 issuers and nearly 60,000 securities worldwide, providing independent credit ratings for financial institutions, corporate and sovereign entities, and structured finance products and instruments. Market innovators choose to work with us because of our agility, transparency, and tech-forward approach.

DBRS Morningstar is empowering investor success as the go-to source for independent credit ratings. And we are bringing transparency, responsiveness, and leading-edge technology to the industry.

That's why DBRS Morningstar is the next generation of credit ratings.

The information upon which DBRS Morningstar credit ratings and other types of credit opinions and reports are based is obtained by DBRS Morningstar from sources DBRS Morningstar believes to be reliable. DBRS Morningstar does not audit the information it receives in connection with the analytical process, and it does not and cannot independently verify that information in every instance. The extent of any factual investigation or independent verification depends on facts and circumstances. DBRS Morningstar credit ratings, other types of credit opinions, reports and any other information provided by DBRS Morningstar are provided "as is" and without representation or warranty of any kind and DBRS Morningstar assumes no obligation to update any such ratings, opinions, reports or other information. DBRS Morningstar hereby disclaims any representation or warranty, express or implied, as to the accuracy, timeliness, completeness, merchantability, fitness for any particular purpose or non-infringement of any of such information. In no event shall DBRS Morningstar or its directors, officers, employees, independent contractors, agents, affiliates and representatives (collectively, DBRS Morningstar Representatives) be liable (1) for any inaccuracy, delay, loss of data, interruption in service, error or omission or for any damages resulting therefrom, or (2) for any direct, indirect, incidental, special, compensatory or consequential damages arising from any use of credit ratings, other types of credit opinions and reports or arising from any error (negligent or otherwise) or other circumstance or contingency within or outside the control of DBRS Morningstar or any DBRS Morningstar Representative, in connection with or related to obtaining. collecting, compiling, analyzing, interpreting, communicating, publishing or delivering any such information. IN ANY EVENT, TO THE EXTENT PERMITTED BY LAW, THE AGGREGATE LIABILITY OF DBRS MORNINGSTAR AND THE DBRS MORNINGSTAR REPRESENTATIVES FOR ANY REASON WHATSOEVER SHALL NOT EXCEED THE GREATER OF (A) THE TOTAL AMOUNT PAID BY THE USER FOR SERVICES PROVIDED BY DBRS MORNINGSTAR DURING THE TWELVE (12) MONTHS IMMEDIATELY PRECEDING THE EVENT GIVING RISE TO LIABILITY, AND (B) U.S. \$100. DBRS Morningstar does not act as a fiduciary or an investment advisor. DBRS Morningstar does not provide investment, financial or other advice. Credit ratings, other types of credit opinions and other analysis and research issued by DBRS Morningstar (a) are, and must be construed solely as, statements of opinion and not statements of fact as to credit worthiness, investment, financial or other advice or recommendations to purchase, sell or hold any securities; (b) do not take into account your personal objectives, financial situations or needs; (c) should be weighed, if at all, solely as one factor in any investment or credit decision; (d) are not intended for use by retail investors; and (e) address only credit risk and do not address other investment risks, such as liquidity risk or market volatility risk. Accordingly, credit ratings, other types of credit opinions and other analysis and research issued by DBRS Morningstar are not a substitute for due care and the study and evaluation of each investment decision, security or credit that one may consider making, purchasing, holding, selling, or providing, as applicable. A report with respect to a DBRS Morningstar credit rating or other credit opinion is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. DBRS Morningstar may receive compensation for its credit ratings and other credit opinions from, among others, issuers, insurers, guarantors and/or underwriters of debt securities. This publication may not be reproduced, retransmitted or distributed in any form without the prior written consent of DBRS Morningstar.
